ACTS THAT GENERATE LIFE ARE DRIVEN BY LOVE

About us

Acts of Life Tanzania is a non-profit organization that has distinguished itself in the exceptional work it does in Morogoro, Tanzania, in the reception and care of children with cerebral palsy. Your dedication and commitment to these children has transformed lives and provided a loving and inclusive environment for those facing special challenges. Cerebral palsy is a neurological condition that affects children's muscle control and movement. It can result in motor, cognitive and developmental difficulties.

Unfortunately, these children often face stigma, discrimination and lack of adequate resources to address their specific needs. This is where Acts of Life Tanzania comes into play. The organization is dedicated to providing a safe and nurturing environment for children with cerebral palsy, offering them the comprehensive care and support they need for their development and well-being. They believe in equal opportunities for all children, regardless of their physical or mental abilities.

JANUARY - JUN

Moving to a new space

Due to the great demand of mothers with their children with cerebral palsy, we took a step of faith and moved to a new, larger place that allows us to serve more children simultaneously.

Construction of furniture for the growing giants therapeutic school

We prepare an environment where the child is assisted with therapy that, in addition to helping her recover, also develops her intellect.

Neuro Rehabilitation care for children with cerebral palsy

With the new space, managing the Physiotherapy groups, we managed to serve 116 children each week.

Medical Outreach

enter the rural villages with a group of doctors in order to develop lectures on health education and also health care with free distribution of medicines prescribed by doctors.

Rural villages in the Morogoro region.

SOME INDICATORS

Serving people living in rural areas.

At the Neurorecovery Center, we serve 102 children a month and assist their families with education regarding their children's real situation, distribution of some devices to improve their quality of life.

All children have cerebral palsy.
