ACTS OF LIFE TANZANIA

A strong foundation for long-term impact

Phase One of the Acts of Life Tanzania construction initiative has reached **75% completion**. This milestone reflects the generosity of partners who believe that children with disabilities and their families deserve consistent care, practical support, and a place where hope can continue to grow.

75%	2	1
PHASE ONE COMPLETE	MAJOR MILESTONES FUNDED	FINAL FUNDING PRIORITY

What has been achieved

- ✓

LAND PURCHASE COMPLETED

The land for the future Acts of Life Tanzania center has been purchased. Securing the site gives the organization a permanent foundation from which services can grow with stability and purpose.
- ✓

WATER WELL FUNDING SECURED

Funding has been secured for drilling the water well. The well will support the future center while also creating an opportunity to serve families in the surrounding community with reliable access to water.

Phase One is now 75% complete.

Brick-making equipment: the final Phase One priority

The remaining step is to secure the equipment needed to produce construction blocks on site. This will allow Acts of Life Tanzania to turn local materials into a practical building resource, reduce dependence on externally purchased blocks, and prepare more efficiently for the next stages of construction.

EQUIPMENT	PURPOSE
Block press	Forms strong and consistent construction blocks
Concrete mixer	Improves consistency and production efficiency
Vibrating equipment	Strengthens compaction and finished block quality
Block molds and tools	Supports repeatable, on-site production

CURRENT FUNDING PRIORITY

USD 4,500

Brick-making equipment package

Why this matters

This investment is more than the purchase of machinery. It is a step toward responsible construction, better use of donated resources, and greater local capacity. Producing blocks on site will help the project move forward in an organized and sustainable way while creating skills that remain within the community.

An invitation to build with us

Every completed milestone has been possible because people chose to stand with children and families in Tanzania. We invite foundations, nonprofit partners, companies, and individual donors to help complete the final 25% of Phase One. Together, we can prepare the ground for a center where rehabilitation, family support, training, and community care can continue for generations.

ACTS OF LIFE TANZANIA

Building capacity. Strengthening families. Expanding access to care.
